

## **Partnering with Cabot to serve you better!**

*(09 May 2019)*

**Cabot Norit Activated Carbon** is a premier activated carbon manufacturer respected for experienced personnel, diverse products and strong customer relationships.

**NORIT SX SUPER S** powdered activated carbon (Activated Carbon; E 153 (allowed food additive, Vegetable Carbon) is made from a 100% sustainable plant-based feedstock and is very high purity, making it ideally suited for use in a range of consumer products due to its gently abrasive, adsorptive and opacifying properties.

**Applications:** The grade is ideally suited for consumer applications, including:

- Toothpaste (whitening)
- Face and body scrubs (exfoliating)
- Soaps and shampoos (adsorptive)
- Kajal and mascaras

It can also be used as a black colorant in foods and cosmetics in Europe and most countries in Asia Pacific.

**Benefits:**

- This grade of charcoal powder shows excellent adsorptive properties and is designed to meet the stringent purity specifications for cosmetics applications.
- With its narrow particle size distribution, it is ensured to give good and even material flow, and extremely high purity specifications for metals and polycyclic aromatic hydrocarbons (PAHs).
